WE INTRODUCE OURSELVES

Since its foundation in 2005, we have been developing and distributing floor sockets, retractable supply posts, wall distributors, energy columns and LED solutions for indoor and outdoor use, with a focus on quality, design and the best value for money.

In addition to our extensive standard program, we also offer individual developments and custom-made products. Our wide range of services guarantees a fast and efficient implementation of your requirements.

The fact that our products are exclusively developed and manufactured in Germany can be seen in the noble design, the high-quality material and the sophisticated workmanship. Whether robust and weatherproof for outdoor use, or decent and adapted indoors, our products are always designed functional and practical to handle.

For our products we only use VDE-certified socket inserts, which you can also purchase in accordance with French, Danish, Belgian or Swiss standards.
